Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments:

A general overview of the application and the above cited art was discussed. Of particular concern is the employment of a "Neural Network" in the transformation process, as disclosed in the submitted application. The cited art teaches of using principles and techniques used in constructing and fine-tuning Neural Networks, but instead focuses those methodologies on variable filtering techniques. As disclosed, the art is not directed towards constructing and optimizing Neural Networks in wavelet transformations. Also addressed was the Examiner's allegation that the Applicant failed to comply with 37 CFR 1.111(b), as noted in the Final Office Action submitted on March 8, 2004 (see paper no. 10, paragraph no. 6). Examiner notes that the Applicant's response to the Initial Office Action did specifically address the absence of a "Neural Network" as it related to claims 1-6, 8, 10-17 and 19 of the application. Allowability with respect to claims 1-20 will be fully reconsidered in subsequent responses.
